

Implementing Fundtrac at Partner Organisations Worldwide

A project of  eed

SADRI stands for “Service d’Appui au Développement Régional Intégré”, a Congo-based NGO active in integrated regional development aid for marginalised and disadvantaged people.

SADRI acts as the centre for community development in the south-east of the Democratic Republic of the Congo. Its multifaceted and extensive projects are aimed at the alleviation of the core problems of the Katanga region, ie. primary education, community development and support to traumatized victims of torture. From Lubumbashi 15 development experts serve the region through democratic and legal assistance, rural development consultancy, agricultural support and even the financing of projects through micro-credits.

SADRI has set up Fundtrac® as the main financial solution for the management of all donor-funded projects run by SADRI. Thanks to Fundtrac® SADRI can now deliver targeted development aid services based on accurate and timely project reports that fulfil the highest international standards.

Project Objectives

- Implementation of Fundtrac® as the main solution for project accounting and financial bookkeeping
- Improvement of the internal and external reporting practice (ie. project transparency, audits of the donor organizations etc.)
- Improved budgetary control and real-time access to all relevant project data
- Implementation of a satellite-based communication system to remotely plan, manage and report on projects
- Training of employees and continuous assistance in raising the effectiveness of donor-financed projects

Project Scope

- Employment of Fundtrac for the management of local and regional projects financed by international donor organizations
- Total initial project volume of 3 million €
