

Implementing Fundtrac at Partner Organisations Worldwide

The Makhad Trust supports nomad communities globally. The foundation based in the United Kingdom and registered in both Europe and African countries began its activities years ago to save the natural heritage of the nomadic people of the world and to protect their unique cultural achievements and indigenous knowledge.

The Makhad Trust intends to achieve this through educational activities, intercultural exchange programmes and local community advancement. For this purpose, a program of projects has been set up to enable travelling visitors to participate in rebuilding physical heritage and experience the unique living culture of the nomadic people.

CIWI GmbH helps the Makhad Trust in developing its operations on the Egyptian Sinai peninsula. The focus of the cooperation is the development of innovative project proposals and the acquisition of project funds from international donors. In addition to this, CIWI GmbH also supports the Trust in other areas such as technical and specific expert consulting services.

Project Objectives

- Support long-term projects to advance sustainable rural development and extend the Sinai Bedouins' sources of income
- Re-cultivation of abandoned Bedouin gardens and water wells

Project Scope

- 1250.000 €, 50% of which applied for with the European Union
- Project duration: 4 years
- Implementation of mechanisms of close collaboration between the Bedouins, the St. Catherine monastery monks and the Trust itself
